PROFESSIONAL SUMMARY

A results-driven Frontend Developer specializing in React.js with expertise in creating dynamic, user-friendly interfaces. Currently expanding into full-stack development with Next.js, Vue.js, Node.js, and NestJS. Strong focus on delivering high-quality solutions with excellent problem-solving skills and a commitment to continuous learning. Experienced in managing multiple projects, implementing GraphQL APIs, and building responsive web applications with modern technologies.

TECH STACK

Front End: React.js, Next.js, Vue.js, Micro Frontend, HTML5, CSS3, JavaScript (ES6+), TypeScript

Back End: Node.js, NestJS, Express.js, REST APIs

Styling Libraries: Tailwind CSS, Ant Design, Styled Components, Bootstrap

State Management: Recoil, Redux, Context API

API & Data Tools: GraphQL, Apollo Client, Axios

Database: SQL

Utility Libraries: Lodash, Moment.js, Day.js, React Hook Form

Version Control: Git, GitHub

Productivity Tools: VS Code, Postman, Swagger

EXPERIENCE

FRONTEND DEVELOPER | EmbraceIT

January 2022 – Present

Embrace IT is an expanding Danish management consultancy house and software development partner with 85+ highly skilled specialists and developers based in Denmark, Vietnam and Pakistan.

Workspace – HR Portal

- Built a comprehensive HR Portal using React.js with TypeScript for enhanced type safety and code maintainability

- Implemented Apollo Client for efficient GraphQL query management and data fetching
- Utilized Recoil for advanced state management across the application
- Designed consistent and responsive UI using Styled Components and Ant Design
- Integrated React Hook Form for simplified and performant form handling
- Managed date operations efficiently using Moment.js
- Contributed to backend development, expanding full-stack capabilities and understanding of end-to-end development

Kitchen Cafe - Food Ordering Platform

- Developed a dual-application platform with an Admin Panel (React.js) and User App (Next.js)
- Built responsive and performant interfaces using Tailwind CSS for rapid UI development
- Implemented Redux for robust state management across both applications
- Utilized TypeScript to ensure type safety and reduce runtime errors
- Integrated Axios for efficient API communication between frontend and backend
- Enabled users to browse customizable menus and place orders seamlessly
- Developed vendor management features in the Admin Panel for meal and order management

Trudy – YouTube Channel Analysis Extension

- Developed a Chrome extension using React.js for analyzing YouTube channels
- Implemented Context API for efficient state management across components
- Built event-driven architecture for real-time data retrieval and analysis
- Created features to evaluate channels for brand collaborations, sponsorships, and promotional opportunities
- Enhanced user experience through responsive design and intuitive interface

Additional Contributions

- Successfully managed and delivered multiple frontend projects with focus on performance and SEO optimization
- Developed and implemented GraphQL APIs for efficient data communication
- Applied SQL for database management and complex querying operations
- Explored backend development using NestJS to expand full-stack capabilities
- Built responsive web applications using Next.js with emphasis on performance optimization

FRONTEND INTERN | EmbraceIT

September 2021 – December 2021

- Learned and applied frontend architecture design patterns using React.js
- Worked with Recoil for effective state management in React applications

- Gained hands-on experience with TypeScript for type-safe development
- Implemented GraphQL for efficient data fetching and manipulation
- Improved debugging and problem-solving skills through real-world project contributions

SOFTWARE ENGINEER INTERN | Amco IT

May 2021 – August 2021

- Designed and implemented responsive user interfaces using HTML5, CSS3, and Bootstrap
- Learned advanced ES6 JavaScript concepts through hands-on practice and real-world applications
- Developed foundational skills in web development and modern JavaScript frameworks

EDUCATION

Bachelor of Science in Software Engineering

2017 – 2021

University of Lahore

DAE in Civil Engineering

2015 – 2017

Sargodha Institute of Technology
